

ACACES 2020

# Certificate of Attendance

To Whom It May Concern,

On behalf of the European Network on High Performance and Embedded Architecture and Compilation (HiPEAC), funded under the European Horizon2020 research and innovation programme under grant agreement number 779656, I would hereby like to confirm that **Igor Wodiany** – The University of Manchester – attended the virtual ACACES Summer School from July 6, 2020 to July 17, 2020.

Igor Wodiany attended all sessions for the following courses:

- *David Kaeli*: "Exploiting the Benefits of Graphics Processing Units: Programming, Architectures and Simulation"
- *James Mickens*: "Software-level Attacks on Architectural and Microarchitectural State"
- *Kerstin Eder*: "Whole Systems Energy Transparency: More /power/ to software developers!"
- *Rajeev Balasubramonian*: "Machine Learning Accelerators"
- *Tullio Vardanega*: "A glimpse of real-time systems theory and practice in the wake of multicore processors and mixed-criticality"

More information can be found on <https://www.hipeac.net/acaces/2020/>

Please do not hesitate to contact me for additional information.

The coordinator,  
**Koen De Bosschere**
